1 Introduction

1.1 Purpose

The purpose of this document is to inform the users about enhancements and bug fixes in the Nauticus Hull January 2009 from the main release to Patch 1.

1.2 Updates in this Release Note

This release note might be updated with new information after the distribution of this patch. To check the latest updated version of this document, please see our Internet page [DNV Software Download and Updates](#). To open this page you can follow this [Link](#).

1.3 Installation

Prior to this upgrade you must have the Nauticus Hull January 2009 version installed, and in most cases you need the install files from this installation when running this upgrade.

2 Program Updates

- Add spreadsheet *IA1-FEABucklingPostProcTemplate.xls* for 1A1 Buckling Control (Pt.3 Ch.1 Sec.13).
- An error in *CSR-Tank_PriSupMemb.xls* causing the program to stop working has been corrected.
- Update *siftooldll.DLL* to fix problems with reading SIN files from some spreadsheets.
- Updated *PolarClass2008Jan.xls* spreadsheet to support vessels longer than 250m.
- The *Automatic Buckling Check – CSR-Tank* failed when exporting panels to PULS (.pbp files). This problem is now corrected.
- A bug in the saving method of buckling jobs caused the models to be corrupted and causing crash situations when opening the jobs again or creating reports. This is now fixed.
- In some cases the loading conditions for *Automatic Buckling Check – DNV IA1* were not available in the selection list when plotting results. This problem is now corrected.

Known issues, program errors and limitations are found in the online **Status List**:
